SKIN CARE TECHNOLOGY

by medyglobal

A wide range of potent combinations of active ingredients for professional skin and hair care.

ACNE MD

Specific treatment to treat acne, regulate excess oil, eliminate dead skin and restore the appearance and tone of the skin.

Indications:

Recommended for active acne.

Regulates and diminishes pimples, regulates excess oil and sebum, eliminates dead skin and bacteria and provides a greater anti-inflammatory effect, while helping to normalize skin problems and restore facial appearance and tone. It activates the formation of new fibroblasts, recovers marks and depressions caused by acne, producing new collagen and increasing elastin production.

Ingredients:

Aqua (Water), Dimethylaminoethanol Tartrate, DNA, Cyanocobalamin, Ascorbic Acid, Retinol, Tocopherol, Phenoxyethanol, Sodium Hyaluronate, Methylsilanol Mannuronate, Hamamelis Virginiana Leaf Extract, Potassium Azeloyl Diglycinate, Propolis Extract, Salicylic Acid, Ethyl hexylglycerin, Oxyde Zinc, Magnesium Lactate, Manganese Gluconate, Lauroyl Lysine, Arginine, Leucine, Valine, Alanyl Glutamine.

Presentation:

10 vials x 5ml.

BTX EFFECT

Powerful Antiaging that smoothes wrinkles and causes a tightening effect on the skin.

Indications:

Recommended as anti-aging and for smoothing wrinkles and tightening the skin. The first real alternative to the use of botulinum toxin with muscle relaxing action that allows, thanks to the synergistic action of 4 active ingredients, to smooth wrinkles and treat any hypotonia of face and body.

Ingredients:

Aqua (Water), Sodium Chloride, Dimethyl Mea, Glycolic Acid, Camellia Sinensis Leaf Extract, Hydrolyzed Hibiscus Esculentus Extract, Acetyl Hexapeptide-8, Arginine, Caprylyl Glycol, Acetyl Hexapeptide-30.

Presentation:

10 vials x 5ml.

ENZYMES MIX LIQUID

Activator of fat dissolution and liquid retention.

Indications:

Recommended for activating fat dissolution, skin tightening and fluid retention. Lipase, collagenase and hyaluronidase enzymes break fat into small molecules to be absorbed by the body and released quickly.

Ingredients:

Aqua (Water), Mannitol, Sodium Hyaluronate, Calcium Chloride, Cyclodextrin, Lipase.

Presentation:

10 vials x 5ml.

HYALURONIDASE LIQUID

Helps break down fat cell tissue.

Indications:

Recommended for fluid retention, helping to dissolve fat. Hyaluronidase acts as a facilitating enzyme in the treatment of adipocyte elimination and fluid retention. It helps to break down fat cell tissue.

Ingredients:

Aqua (Water), Mannitol, Enzymes, Glycine.

Presentation:

10 vials x 5ml.

WHITENING MD

Cell renewal stimulator that improves skin texture, reduces the appearance of blemishes and provides radiance.

Indications:

Recommended for hyperpigmentation. Whitening is indicated for the treatment of pigmentation and cleansing of the skin. The active ingredients reduce melanin production, gentle exfoliation in the superficial layers of the skin to remove pigmented cells. They stimulate cell renewal, neutralize free radicals, improve skin smoothness and reduce the appearance of blemishes, giving the skin a brighter appearance.

Ingredients:

Aqua (Water), Glutathione, Ascorbic Acid, Pyruvic Acid, Phenoxyethanol, Ethylhexylglycerin, Sodium Benzoate.

Presentation:

10 vials x 5ml.

HAIR MD

Powerful combination of active ingredients that stimulates hair growth and reduces hair loss.

Indicaciones:

Recomendado para la pérdida de cabello. Hair results from a combination of amino acids, vitamins and minerals. The active ingredients significantly improve hair structure, regulate sebum production, stimulate hair growth and reduce loss. Prevent the recurrence of dandruff, preserving the scalp hair. Restores scalp microcirculation and revitalizes hair follicles.

Ingredients:

Aqua (Water), Phenoxyethanol, Glutathione, Panthenol, Biotin, Ethylhexylglycerin, Methylsilanol Mannuronate.

Presentation:

10 vials x 5ml.
